**South Carolina  
Department of Commerce:  
Significant Accomplishments  
in a Difficult Year**

Despite a challenging economic environment, the South Carolina Department of Commerce worked harder than ever in 2009 and succeeded in producing impressive levels of new job and investment recruitment. SCDOC continues to recruit companies that are producing some of the finest and most advanced products in the world - which are reaching destinations throughout the globe. SCDOC is committed to building on these successes, ultimately making South Carolina a better place to live, work, play and do business.

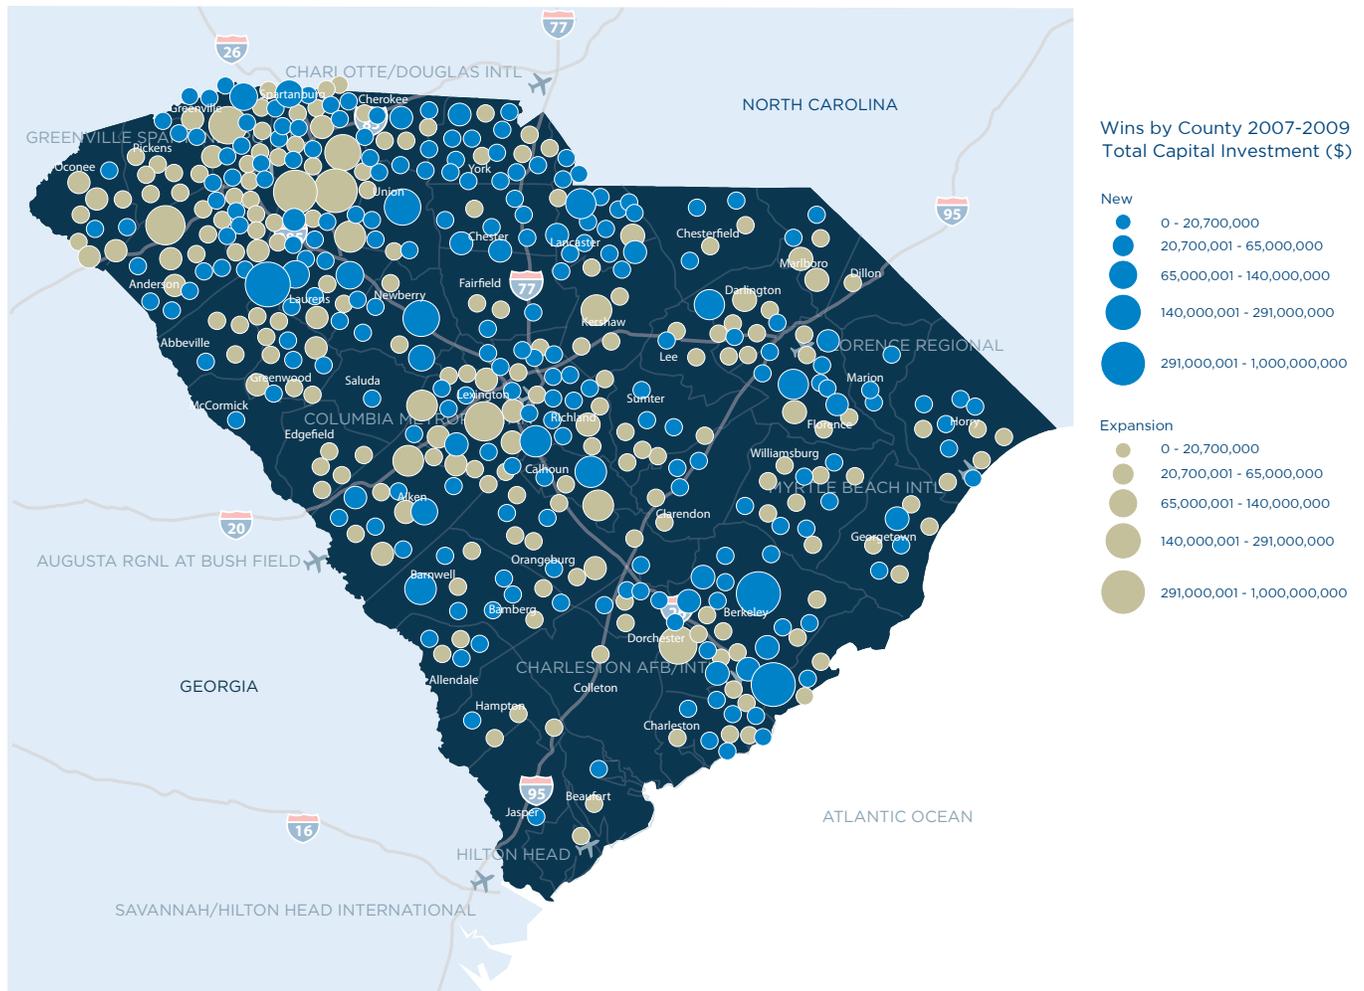

In 2009, Mediterranean Shipping Company announced it would begin calling on Charleston as part of its Golden Gate Service. In February of 2010, the MSC Rita made its inaugural call in the Port of Charleston, linking the Southeast's deepest Seaport with China, Southeast Asia and the Middle East. The 1,065-foot-long vessel has a maximum draft of 47.5 feet.

# South Carolina Attracts Substantial Jobs & Investments

From 2007 - 2009, SCDOC has recruited 52,663 jobs and more than \$10.5 billion in capital investment. Despite the challenging economic environment, Commerce came very close to its record-breaking 2008 job recruitment levels, recruiting more than 18,000 new jobs in 2009.

Those jobs were recruited from a variety of industries with world-class companies such as The Boeing Co., TBC Corp. (Tire Kingdom), Red Ventures, DHL Global Forwarding, GE Aviation, BAE Systems, Scientific Research Corp. and many more making significant commitments to invest and create jobs in South Carolina.

## Projects in Every County, 2007-2009

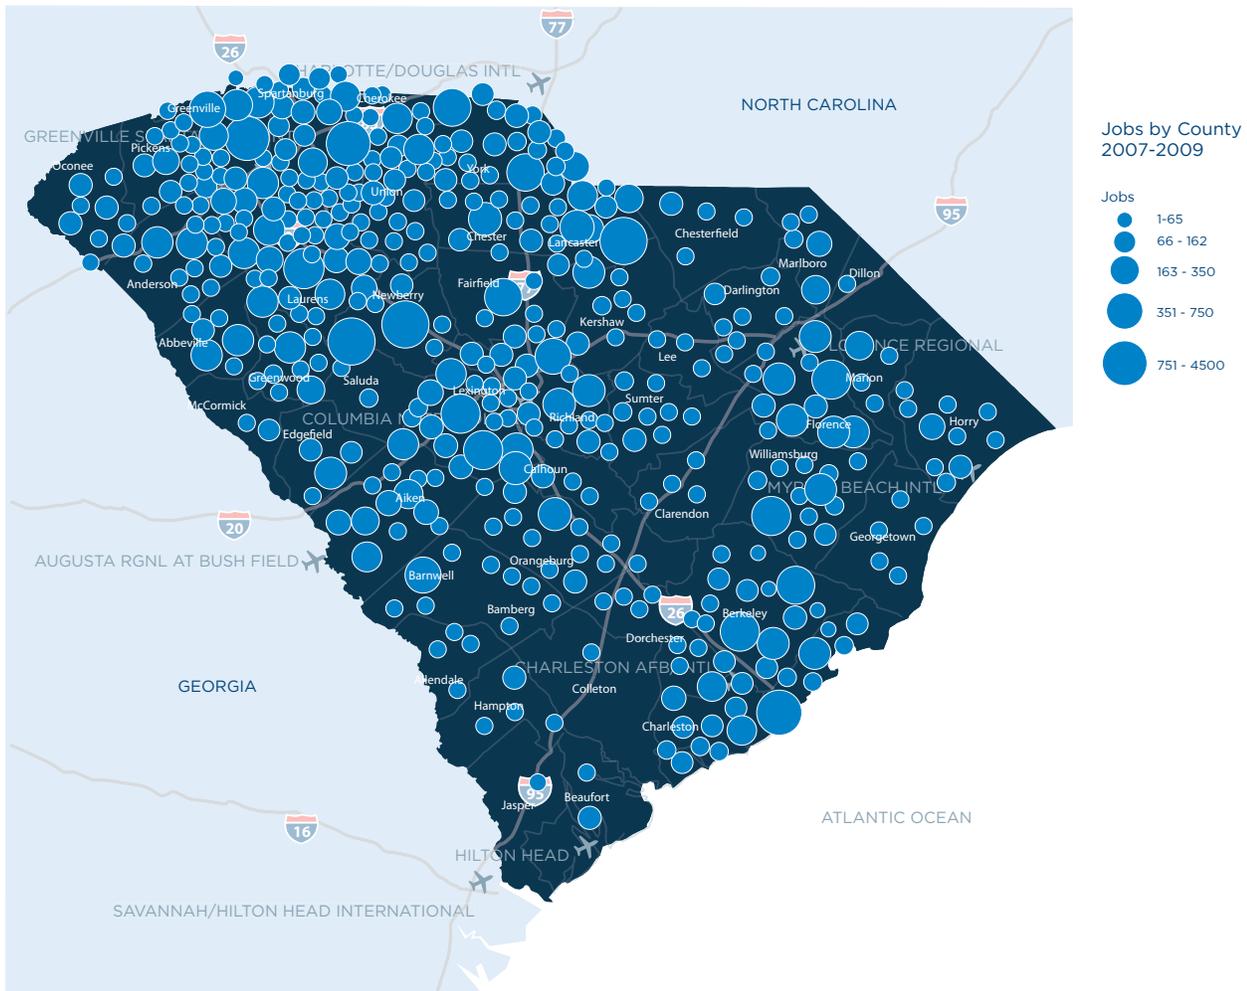

# South Carolina Attracts Substantial Jobs & Investments

We are pleased to expand in Charleston County. The area has an excellent business environment that is well-matched to fit the needs of our growing company, while giving us access to a talented workforce. SRC has experienced strong growth in recent years and we look forward to continuing that growth in South Carolina.

- Michael Watt, president and CEO, Scientific Research Corporation

# South Carolina Department of Commerce Leads the Southeast in Job Recruitment

South Carolina's success is evident when compared to its neighbors. The South Carolina Department of Commerce's job recruitment efforts were #1 in the Southeast for 2009.

# 39.5

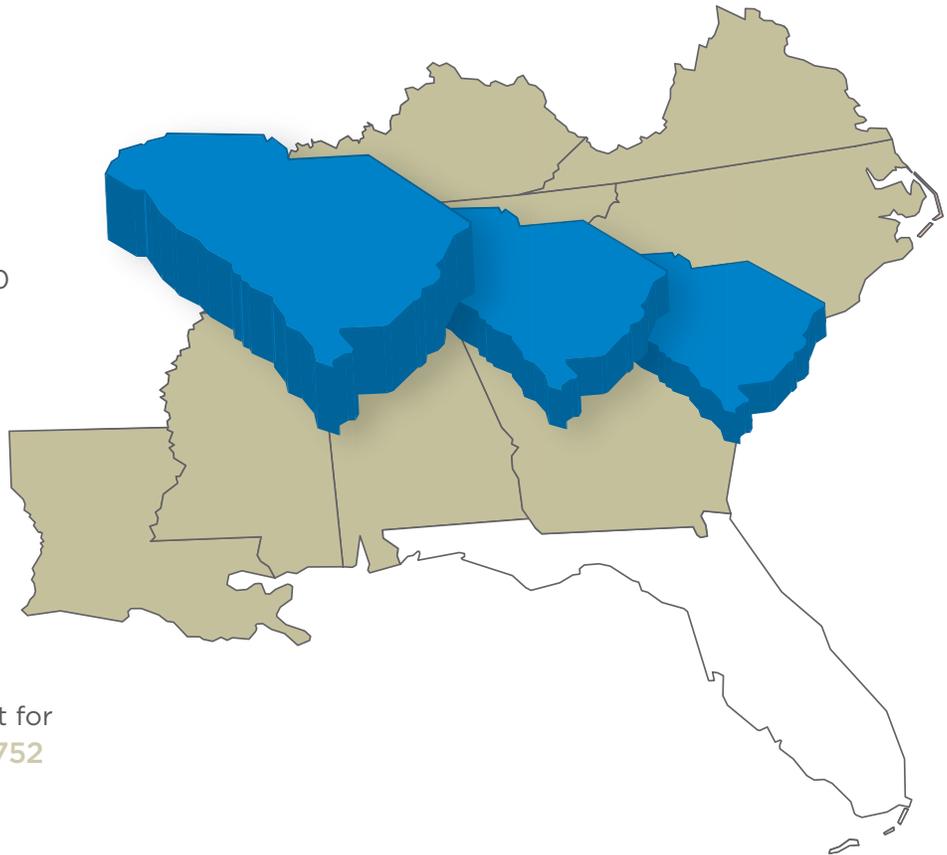

Jobs Recruited by the SCDOC  
per 10,000 Residents in 2009

Average Job Recruitment for  
Southeastern States per 10,000  
Residents in 2009 was **22.8**

# 18,004

Jobs Recruited by  
the SCDOC in 2009

Average State Job Recruitment for  
the Southeast in 2009 was **13,752**

Note: Some states shown above compile annual job recruitment numbers based on a general survey of economic activity. In an effort to increase accountability, the South Carolina Department of Commerce since 2003 only includes projects worked and jobs recruited directly in the agency's year-end results and does not include public, utility or real estate projects in its numbers.

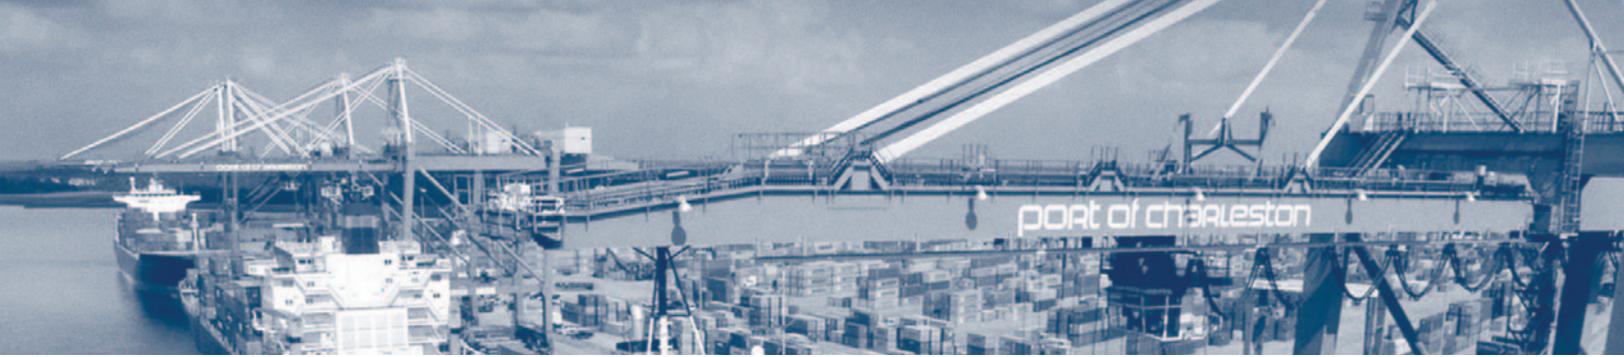

IBM's Global Location Trends 2009 Annual Report named South Carolina 4th among all states and provinces in North America by estimated jobs recruited.

## TIMKEN

We are very pleased to expand our presence in Spartanburg County.

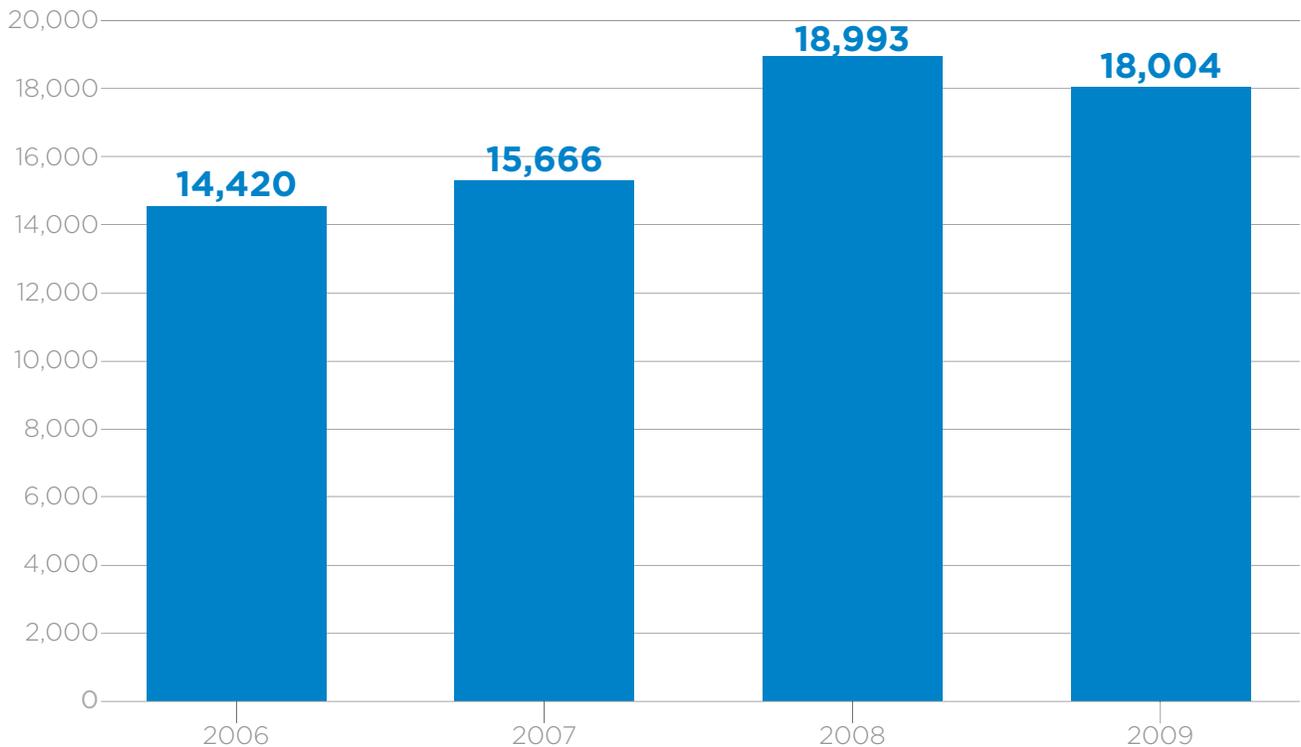

Having a larger facility in the area provides significant customer service efficiencies. With much of our supply chain based in the Southeast, consolidating our distribution in the region will help us reduce movements between locations to serve customers more quickly. That also will make our operation leaner and greener.

- Chris Coughlin, president, Process Industries Division, Timken

## SCDOC continues to produce impressive results despite a challenging economic environment

### Jobs Recruited 2006 - 2009

We are pleased to expand our operations in South Carolina. This investment will allow us to meet growing demand from our customers in the U.S., especially in the electric drive vehicle industry. Our Simpsonville facility has been an important part of our production capabilities over the years and South Carolina has always provided KEMET with an excellent business environment and a highly-skilled workforce. We appreciate the support we have received from state and local officials, and South Carolina's congressional delegation who helped make this expansion a reality.

- Per-Olof Loof, chief executive officer and director, KEMET

## Project Updates... The Progress Continues

In 2007, Starbucks Coffee Co., premier roaster and retailer of specialty coffee in the world, announced that it would open a state-of-the-art roasting plant in South Carolina and create approximately 160 new jobs when fully operational. In 2009, Starbucks opened the doors to its new Calhoun County facility and is supplying coffee to the company's southeastern United States stores.

## New vs. Existing Job and Capital Investment Recruitment 2006-2009

### New Jobs 2006-2009

In 2009,  
SCDOC recruited  
**18,004**  
new jobs to South Carolina.

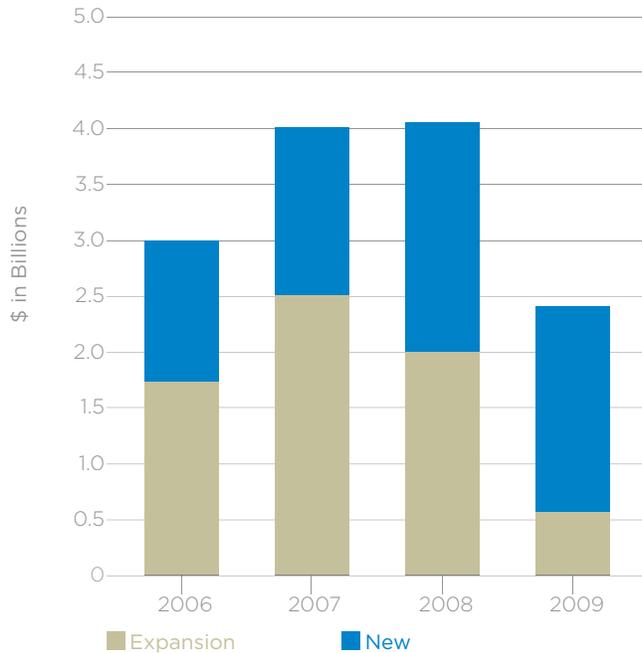

In 2009, the state had four  
public job announcements  
that were each  
**1,000 jobs**  
or larger – Samsung, Red  
Ventures, Crane Co. and  
The Boeing Co.

## Project Updates... The Progress Continues

### **Monster® Opens State-of-the-Art Facility in 2009**

In 2008, Monster®, the leading global online career and recruitment resource and flagship brand of Monster Worldwide Inc., announced that it would open a state-of-the-art customer service facility in Florence County. South Carolina celebrated the grand opening of this new, 75,000-square-foot facility in 2009. The facility currently employs approximately 150 full-time employees and will create up to 750 jobs over five years.

mo

“We chose Florence because it has the talent, standard of living and educational resources we needed to bring premier service to our customers. This opening represents another major milestone for Monster as we continue to expand our products and services to help connect job seekers and employers.”

- Art O'Donnell, executive vice president  
Global Customer Services, Monster Worldwide Inc.

monster.com

“Establishing a second 787 assembly line in Charleston will expand our production capability to meet the market demand for the airplane. This decision allows us to continue building on the synergies we have established in South Carolina with Boeing Charleston and Global Aeronautica.”

- Jim Albaugh, president and CEO, Boeing Commercial Airplanes

787 DREAM LINE

Boeing's decision to locate its second 787 assembly facility in South Carolina won the state the 2009 Economic Development "Deal of the Year" from *Business Facilities* magazine.

2009 Accomplishments... South Carolina Continues to Soar

---

## Boeing Lands in South Carolina

---

In October 2009, The Boeing Co. announced its decision to locate its second final assembly site for the company's 787 Dreamliner in North Charleston. Once completed, the new facility will be one of three in the world to assemble wide-body jets.

■ Approximately 56 airlines world-wide have ordered 851 Dreamliner jets. Each jet will have a range of 8,200 miles and carry up to 250 passengers.

■ South Carolina is home to more than 160 aerospace-related companies operating in 28 counties and employing more than 18,000 people.

■ The 787 took its first test flight in mid-December. Because of its unique construction, the Dreamliner will be more efficient, quieter and have lower emissions than previous Boeing airliners.

■ Other companies that are part of South Carolina's aviation and aerospace sector include ATI Allvac, BAE Systems, Bracket and Cochran, Cytec Industries Inc., Champion Aerospace, Eaton, GE Aviation, Lockheed-Martin, Honeywell, Michelin Aircraft Tires, Nasmyth Precision Products, Northrop Grumman and Parker Aerospace.

Boeing's decision to locate in South Carolina is without a doubt one of the largest economic development projects in the state's history. A world-class company like Boeing choosing South Carolina sends a message to the world that we are a business-friendly state with a workforce that has a work ethic and dedication second to none. Boeing's announcement comes at a time when many seek improvement and prosperity, and I believe this will create a tremendous amount of opportunity and benefits for South Carolinians. This is indeed a transformational moment for the entire Palmetto State.

- Senator Hugh K. Leatherman, Sr.

Boeing's decision to expand their presence in our state with an infusion of jobs and capital investment – the largest announcement in South Carolina history – represents not only enormously good news for our state's economy, but also a telling dividend from our state's continued efforts to better our business climate.

**- Governor Mark Sanford**

■ Construction of Boeing's new facility is currently underway and could create up to 2,000 construction jobs. The BE&K Building Group and Turner Construction, with design partner BRPH, was awarded the design-build contract for Boeing's new plant. The BE&K Building Group's South Carolina regional office in Greenville will serve as the headquarters of the design-build team. Additionally, Greenville-based Global Performance LLC was awarded the project and construction management contract.

The Boeing Charleston site is critical to the success of the 787 program. Through this acquisition, Boeing benefits by joining together two solid operations—including their talented employees and state-of-the-art facilities—into one Boeing team. Ultimately, we believe the integration of the site will increase productivity for the 787 program and allow us to maintain our long-term competitiveness.

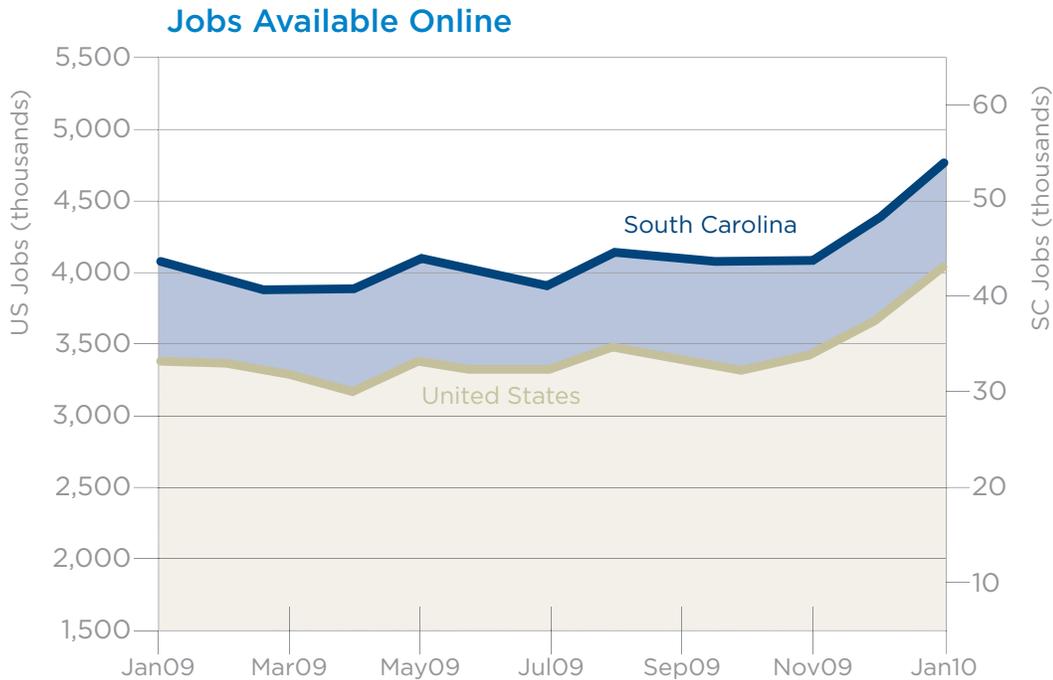

**- Jim Albaugh, president and CEO, Boeing Commercial Airplanes**

The selection of two Greenville firms to perform and manage the construction of the new facility will have an immediate impact on our state's economy and this announcement is further indication that this project will have a positive impact on our entire state. From construction jobs to the impact this activity will have on small businesses and subcontractors throughout our state, this is truly an exciting time for South Carolina. We look forward to more good things to come as a result of Boeing's decision to locate its second 787 assembly line in North Charleston.

**-Joe Taylor, Secretary of Commerce**

## Positive Economic Trends Occurring in South Carolina

Source: The Conference Board Help Wanted Online Index

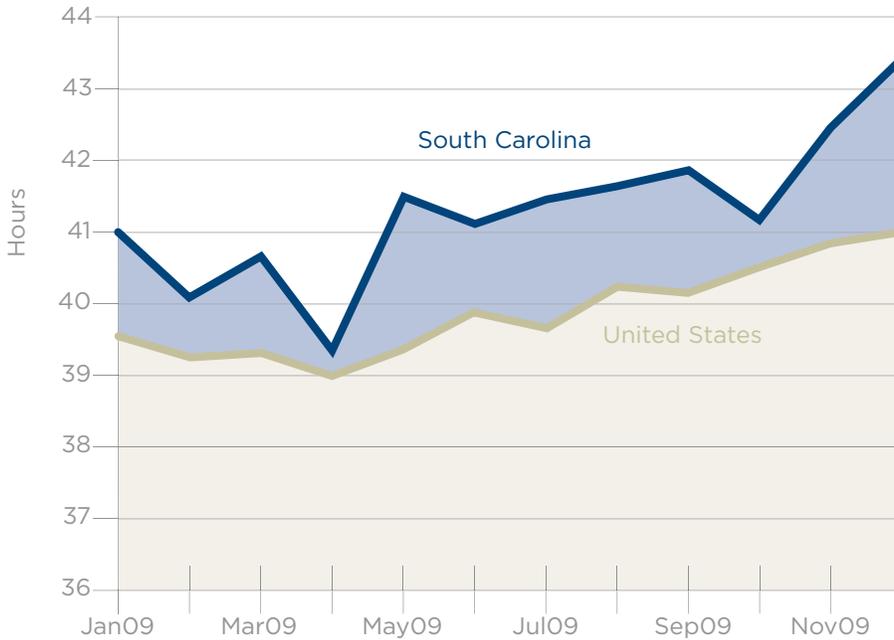

Available Online Job Postings in South Carolina climbed by 4,500 positions to **48,600** Online Job Postings in December of 2009. In 2009, South Carolina had a 20.7% increase in available Online Job Postings, compared to a 19.5% increase across the United States.

MTU Detroit Diesel Inc. will open a new manufacturing facility in Aiken County. The \$45 million investment will create 250 jobs.

## South Carolina's High Credit Rating

South Carolina's credit rating remains one of the highest in the United States according to the country's three major credit rating agencies, Standard & Poor's, Moody's and Fitch.

Standard & Poor's (AA+) stated that one of the reasons South Carolina's credit rating remains high is due to "proactive management, which has contributed to improved financial performance in recent years." Standard & Poor's also believes that South Carolina "...has been actively making the necessary budget adjustments to maintain balance."

Moody's (AAA) stated that its continued highest AAA rating is "...based primarily on the state's conservative fiscal management." They also stated that South Carolina has "...historically taken quick action to address projected budget gaps...and develop a formal process for long-term financial planning."

Fitch (AAA) stated its continued AAA rating is because of South Carolina's "...proven ability and willingness to support fiscal balance."

In March 2008, BMW announced its single largest investment in South Carolina. The announcement included a \$750 million expansion to add 1.5 million square feet to the existing 2.5 million-square-foot campus. Construction of a new 1.2 million-square-foot Assembly facility adjacent to the original factory began immediately following the announcement. In addition, the Paint Shop received a 300,000-square-foot expansion to add new paint lines and processes.

Although the global economy shifted dramatically shortly after the announcement in 2008, construction moved swiftly forward and progressed ahead of schedule throughout 2009. During the height of construction, more than **750 construction workers** were onsite at BMW. Equipment and technology were installed and the first vehicle tests began in the summer of 2009. As the end of 2009 neared, the structure for the new Assembly building and the paint shop expansion were nearly complete and interior work was progressing well.

BMW Manufacturing in Spartanburg will begin full operation in this new facility in late 2010 in preparation for the launch of the next generation BMW X3. The new facilities will provide for an initial production capacity increase to roughly 200,000 units. With completion of this construction, since 1992, BMW's total investment in South Carolina is more than \$4 billion. Over 5,000 people work at the plant in Spartanburg.

## Construction at BMW Moves Swiftly Forward in 2009

Project Updates... The Progress Continues

## **First Facility of Its Kind in North America Opened in South Carolina**

In 2007, Prysmian Power Cables and Systems, a global leader in power and telecommunication cables and systems, announced that the company would expand its South Carolina operations. In 2009, Prysmian opened an extra high voltage power cable factory in Abbeville County. The 373-foot tower incorporating the Vertical Continuous Vulcanization (VCV) process extends the existing Prysmian medium and low voltage cable manufacturing facility in Abbeville by 140,000 square feet. The investment also includes a state-of-the-art 460kV extra high voltage testing capability. The \$46 million facility is the first one of its kind to produce extra high voltage power cables in North America.

## Existing Business Services

---

### Commerce's Existing Business Services Division:

#### Working to Assist Small Businesses in Growth and Development

Commerce's Existing Business Services Division works with entrepreneurs to develop business plans, helps companies access start-up resources and alternative financing opportunities and pairs existing businesses with service providers and suppliers.

## Small Business Ombudsman's Office Assisted Nearly 800 Small Businesses in 2009

Those of us who have made the move to South Carolina appreciate the state's tireless efforts to support us. Our company, Hacker Industries Inc., moved from New Jersey five years ago. Even small businesses like ours are on the radar screen and treated as important to the growth of our state.

- James Mullen, Jr., vice president, Hacker Instruments & Industries, Inc.

### BuySC Program Launched in 2009

The BuySC program is a purchaser-oriented, material and service locator program designed to connect South Carolina companies with South Carolina suppliers and vendors. The goal is to help small businesses control costs and delivery times. Commerce's Existing Business Services Team uses a comprehensive network to match company needs with in-state resources.

BuySC brings great resources to local businesses on a state level and increases the opportunity for in-state businesses to grow, helping to increase the financial impact on South Carolina. The BuySC program shows that the state cares about the local business environment and is committed to making it prosper.

- Ted Coles, general manager, Integrity Tool LLC

Kellett Enterprises Inc. has been in business since 1960 in Greenville and ships products all over the world. We always look to South Carolina to find local suppliers. The BuySC program is very user-friendly and helps connect us to in-state suppliers, which in turn, helps us cut costs and spend more time pursuing new customers.

-Beverly Davis, vice president of Marketing, Kellett Enterprises, Inc.

A Division of the Department of Commerce

## Keeping Businesses on Track

- 2007-2009: 252,201 carloads moved
- 2007-2009: 17,914 efficiency tests completed
- 2009 Operational Performance Measures:
  - Completed 1,346 injury-free days in Mechanical Department
  - Completed 1,224 injury-free days in Train Service

# South Carolina Department of Commerce 2009 Accomplishments

1

The Boeing Co.'s selection of North Charleston as the company's second final assembly site was the

largest single jobs and investment announcement in South Carolina's history. Boeing's investment was recognized as the "Deal of the Year" by *Business Facilities* magazine.

2

IBM named South Carolina 4th among all states and provinces in North America in estimated jobs recruited.

3

SCDOC led the Southeast in job recruitment despite challenging economic times, recruiting more than 18,000 new jobs in 2009, which is very close to its record-breaking year in 2008.

4

Four job announcements that were each 1,000 new jobs or larger - Samsung in Greenville, Crane Co. in Williston, Red Ventures in Lancaster and The Boeing Co. in North Charleston.

5

Six project announcements in Hampton, Allendale, Bamberg and Barnwell Counties totaling 1,139 new jobs.

---

## South Carolina Department of Commerce 2009 Accomplishments

---

Jack Ellenberg, Commerce's Deputy Secretary for New Investment, was named "Person of the Year" by *Southern Business & Development* magazine for his efforts to recruit The Boeing Co. to the state, marking the first time a South Carolinian has received this recognition.

# 6

93% of the Jobs for America's Graduates-South Carolina (JAG-SC) students, who encompassed the first graduating class having been in the program for four years, graduated. This rate exceeded the JAG national standard of 90%.

# 7

The QuickJobs Carolina™ training program was expanded through the assistance of the State Workforce Investment Board, and SCDOC grant funds were utilized to construct QuickJobs training centers in areas without a technical college presence.

# 8

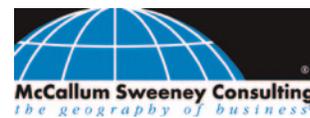

The statewide Career Readiness Certificate program, utilizing WorkKeys®, reached new heights with over 100,000 South Carolinians certified – the highest number of any state nationwide.

# 9

SCDOC established a new and improved site and building certification program in conjunction with nationally recognized McCallum Sweeney Consulting of Greenville.
